GREEN BUILDING LECTURE SERIES
 Fall/Winter/Spring – 2004/2005
 Scottsdale Community Design Studio
 7506 E. Indian School Road, Scottsdale

**Admission
 is
 free**

Visit the Green Building Web Site – www.Scottsdale.Az.gov/greenbuilding

Green building advocates responsible use of our natural resources in the design and construction of our built environment. Each lecture will address one of the many green building topics that demonstrate energy/resource efficient, healthy, and environmentally responsible building practices. Each of the following lectures will take place on the 1st Thursday of the month from **7 to 9 PM** at the City of Scottsdale, **Community Design Studio** located @ 7506 E. Indian School Rd (NE corner of 75 St & Indian School Rd).

November 4, 2004	Alternative Wall & Roof Systems Resource efficient building systems that conserve energy and preserve our natural resources.
December 2, 2004	Natural Building Materials Regional materials that are compatible with our harsh desert environment, abundant, rapidly renewable, and support the local economy.
January 6, 2005	Home Improvements and Green Remodeling An introduction of the newly published green remodeling guidelines. Learn about environmentally responsible and healthy remodeling practices that support sustainable desert living.
February 3, 2005	Building Science: The system approach to Energy Efficiency Learn about the principles of heat flow to create an energy-efficient, safe, comfortable and healthy home. Hear about diagnostic tests used to locate energy performance problems.
March 3, 2005	Interiors & Indoor Environmental Quality Indoor air pollutants can be six times higher than outdoor air. This lecture will address strategies for minimizing indoor pollutants including material selection, ventilation and filtration.
April 7, 2005	Water Efficiency in the Sonoran Desert An overview of water efficiency practices, including indoor plumbing fixtures, xeriscape, gray water and rainwater harvesting.
May 5, 2005	Innovative Green Built Projects in the Phoenix/Scottsdale Area Learn about local innovative projects that excel from the synergistic benefits of energy efficiency, renewable resources, water efficiency, and climatic responsive design.
June 2, 2005	Feng Shui in the context of Green Feng Shui in the context of design and the harmonious flow of energy. Hear about strategies that can be incorporated into your home through sound, smell and visuals.
